### CAUSE

On September 30, 2019, Nooris was released to a five-year term of supervised release after serving a 110-month term of imprisonment. While in the Bureau of Prisons Nooris completed the 500 hour Residential Drug Treatment Program. During the course of supervision, Nooris has maintained steady employment and is currently expecting his first child. Nooris was directed to submit to urinalysis on October 21, 2021. At the time of the directive, Nooris admitted that he had been regularly using methamphetamine. He did submit to urinalysis on October 21, 2021, and it was positive for methamphetamine, which is a violation of Standard Condition No. 7 (drug condition). Nooris claims he is willing to do what it takes to get sober and stay out of prison in order to be present for his child. He agreed to a substance abuse treatment condition being added to his conditions and to complete treatment. He was advised of his rights to a hearing before the Court but waived his rights by signing the attached waiver. Due to his willingness to participate in treatment and get clean, it is respectfully recommended to the Court that he be allowed to remain in the community and have a chance at treatment.
